RESEARCH / DATA AVAILABLE

Limited

There is limited published data on this product or ingredients used in the Black community.

RECOMMENDATION: Based on the data available, the product should be safe to use as per the instructions on the label. We strongly suggest testing with a limited amount of product on a small area and, if irritation occurs, discussing it with a licensed professional before continuing use.

SUPPORTING DATA AND ANALYSIS

Key Area	Findings
Active ingredients	Tetrahexyldecyl ascorbate (soluble form of vitamin C) (10%), tranexamic acid (2.5%)
Inactive ingredients	Water (aqua), glycerin, simmondsia chinensis (jojoba) oil, polyglyceryl-10 myristate, distarch phosphate, butylene glycol, cetearyl alcohol, diheptyl succinate, capryloyl glycerin/sebacic acid copolymer, propanediol, vaccinium myrtillus fruit extract, phenethyl alcohol, cetearyl glucoside, pectin, saccharum officinarum (sugar cane) extract, caprylhydroxamic acid, citrus aurantium dulcis (orange) fruit extract, citrus limon (lemon) fruit extract, xanthan gum, hydroxyethylcellulose, disodium EDTA, acer saccharum (sugar maple) extract, carica papaya (papaya) extract, phenoxyethanol, annona muricata (soursop) extract, zingiber officinale (ginger) root extract, biosaccharide gum-1, carbomer, polysorbate 20, sodium lactate, glucose, sodium hydroxide, palmitoyl tripeptide-1, palmitoyl tetrapeptide-7

Formulation concerns	• The preservatives phenoxyethanol and caprylhydroxamic acid are safe in small amounts but can cause irritation in sensitive individuals. • Fruit extracts—citrus aurantium dulcis (orange), citrus limon (lemon), vaccinium myrtillus (bilberry), carica papaya (papaya), and zingiber officinale (ginger) root—have the potential to cause irritation. • Patch testing is encouraged prior to use.
Research and ingredient analysis	• Tetrahexyldecyl ascorbate is a stable, oil-soluble form of vitamin C with antioxidant properties that brightens the skin. • Tranexamic acid (2.5%) helps reduce hyperpigmentation and dark spots. • The fruit extracts cited have exfoliating and brightening properties. • The moisturizers and hydrators—including glycerin, simmondsia chinensis (jojoba) oil, polyglyceryl-10 myristate, butylene glycol, saccharum officinarum (sugar cane) extract, biosaccharide gum-1, and sodium lactate—contribute to improving upper skin layer conditioning. • The two peptides, palmitoyl tripeptide-1 and palmitoyl tetrapeptide-7, are known to help repair visible skin damage as well as provide moisturizing effects. • The moisturizers and peptides may help offset any potential irritation from the fruit extracts and active ingredients.

UNDERSTANDING YOUR RESULTS

WeSeeColor evaluates products by examining the ingredients listed on product labels and reviewing available scientific research and literature on both the products and their individual ingredients. Each product is rated on a 5-point scale, considering ingredient safety (and the potential for adverse reactions), the availability of data and research, and documented efficacy on Black skin and hair, when available.

SAFETY RATING

Very High Risk	High Risk	Moderate Risk	Low Risk	Very Low Risk
				
Caution. Strong likelihood that this product may cause irritation and/or an allergic reaction. Seek medical attention if exposed.	This product may cause irritation and/or an allergic reaction. Be careful and consult your physician.	In certain situations, this product may cause irritation or an allergic reaction. Speak with your physician to learn more.	Generally safe. Product ingredients have low irritancy or allergy potential.	Safe to use on most occasions. Product ingredients have negligible irritancy or allergy potential.

RESEARCH / DATA AVAILABILITY RATING

None	Limited	Fair	Good	Robust
				
There is no data on this product or ingredients used in the Black community.	There is limited published data on this product or ingredients used in the Black community.	There is a fair amount of published data or documented usage in the Black community.	Product or its ingredients have been studied extensively or used extensively in the Black community.	This product or its ingredients have been studied extensively, used extensively, and known in the Black community.

GENERAL CONSIDERATIONS

- Dietary supplements can have unexpected interactions with other products, drugs, or conditions. If the product is characterized as a dietary supplement, we recommend starting with a small intake and monitoring for potential side or adverse effects and consult with a licensed professional before resuming use.
- Allergens may sometimes be listed in labels using their scientific name (e.g. “arachis hypogaea oil” for “peanut oil”). Familiarize yourself with the scientific name of any ingredient to which you may be allergic and review the label carefully before starting usage.
